

NP45

BENEFITS

The NP45 is one of the best texturized nylon putting surfaces on the market. Second only to its higher quality counterparts, NP50 and NP55, this product offers natural roll and realistic speeds for a true putting experience. This turf performs best with the high end ceramic infill offered by Synthetic Turf International, but NP45 can also be used without infill, which makes it an ideal indoor/portable putting surface. When will it be time for you to Experience A Greener World and a better golf game?

It is the policy of Synthetic Turf International to continuously improve their line of products. Therefore, Synthetic Turf International reserves the right to change, modify or discontinue systems, specifications and accessories of all products at any time without notice or obligation to purchaser. These are standard specifications subject to manufacturing tolerances and consumer requests.
