ADVANTAGES

- Increases available time of use
- Improves performance and safety
- Allows more time for practice
- High performance quality
- Reduces the need for maintenance
- Provides a true ball roll and bounce
- Always ready for use
- Consistent performance over time and use

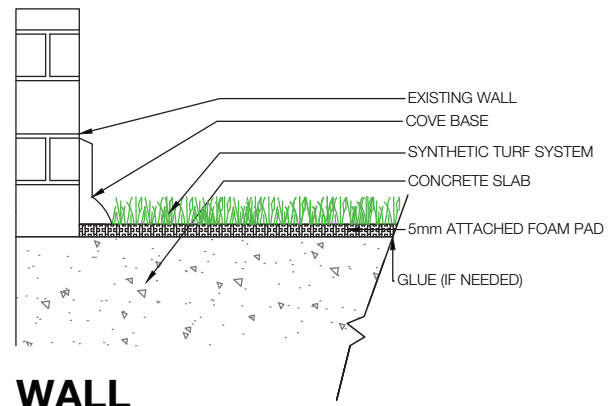

BOCCE PRO

BENEFITS

Bocce is a game that has been enjoyed for centuries. The object is for one or more of your team's balls to be closer than any of your opponent's balls to the pallina at the end of every set.

One of the reasons Bocce continues to grow in popularity is that it can be played almost anywhere.

Since there is no need for infill Oyster Bocce Pro, it's a great choice for indoor and portable applications, and with seven standard color choices, and custom colors available upon request, this is a great choice for locker rooms and agility and training facilities as well.

It is the policy of Synthetic Turf International to continuously improve their line of products. Therefore, Synthetic Turf International reserves the right to change, modify or discontinue systems, specifications and accessories of all products at any time without notice or obligation to purchaser. These are standard specifications subject to manufacturing tolerances and consumer requests.
